

VENTOFLOW[®] HVLS 8.8 FT PORTABLE INDUSTRIAL FAN

Our new industrial portable HVLS fan comes with an impressive airflow and provides a long distance air reach. It is built on a strong steel body and comes with omni-directional wheels to be transported virtually anywhere.

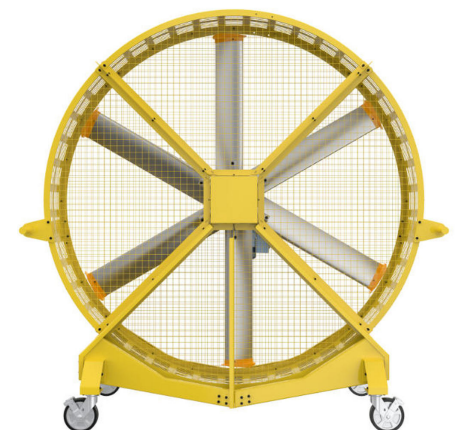

Our fan blade design allows for the airflow to reach distances up to 120-130 feet in a 20 feet wide area. We use precision machining

technology to ensure product tolerance and a good dynamic balance, along with safety mechanisms that provide high efficiency and a quiet operation.

Low energy costs and quick return on investment will save you money compared to a traditional pedestal fan.

CHARACTERISTICS

- Max Speed: 226 RPM
- Airflow: 56,000 CFM
- Motor Power: 1.1 Kw
- Voltages available: 220V/380V, 60Hz/50Hz.
- Weight: 476 lbs.
- Available in Yellow and Black Colors
- Warranty: 3 years on all components; lifetime warranty on hub and blades.
